

The Jumbo VR of Meijer Holland is designed for grabbing wrapped bales (round or rectangular) from the side. The Jumbo VR is standard available for 2 or 4 bales: VR 2 and VR 4.

Jumbo VR

- suitable for wheel loader or telescopic handler
- very heavily built
- the arms slide under pressure from 2 cylinders through 2 U-profiles.
- the cylinders are in a line; this makes the bale grab even stronger and very suitable for heavy users
- plastic wearing profiles on the extending parts to prevent wear
- no damage to the bale foil thanks to two specially developed arms
- overpressure relief valve

Type	Number of bales	Work wide	Max. capacity	Width	Height	Weight
Jumbo VR 2	2	100 to 225 cm (3 positions)	1.500 kg	200 cm	80 cm incl. red attachment: 127 cm	526 kg
Jumbo VR 4	4	2x 125 to 180 cm	3.000 kg	300 cm	80 cm incl. red attachment: 127 cm	800 kg

Options Jumbo VR series

- removable brackets
- hydraulic hoses and couplings

Jumbo VR 2
